

HORIZON FREIGHT LINES

Mr. Norman N. Glass
Power Up Indiana
1111 E. 51st Street
Indianapolis, IN 46220

Dear Norm:

I wanted to let you and anyone else interested know about the great result we're getting from use of Power Up in our trucks and tractor-trailers.

If you remember I thought your product was jest another additive scam when your dealer first called. The demo impressed me enough to buy a pail. Part was used for dyno testing and the results were so good that we started putting it in all vehicles. We are getting anywhere from .9 to 1.2 or 1.3 extra miles per gallon used. For all trucks and tractors the average is right about 20%. That's more than mark and Danny told us we could expect.

I also put Power Up in my own pickup truck and a piston knock can't be heard anymore.

If you ask me would I recommend Power Up to other truckers and smaller vehicle fleet operators the answer is a big yes.

Sincerely yours,

Ed Land
