HENRY SENN  
Third District  
Kingfisher, Oklahoma

Mr. David Potter  
Poewr UP  
8034 S. Memorial  
Tulsa, OK 74133

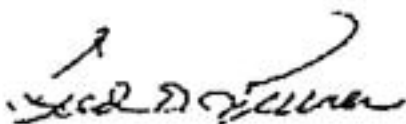

Dear David:

We had only had Power Up a few days and found several results:

- 1) '84 Ford 2-ton Dump truck.; This trucks differential made an extremely loud noise when being driven. We added Power Up at 5% and the difference was unbelievable. After 3 to 4 mi. of operation, the noise was completely gone!
- 2) '83 Chevy 2-ton Dump truck.; This truck's power steering had always groaned horribly. We put only one ounce of Power Up in there and to everyone surprise, again, the noise completely was gone.
- 3) We have a shop machinery clock that hasn't worked at all in over two years. One of our hands decided to give it a try... a couple of drops of Power Up in the motor mechanism and yes, the clock has been telling perfect time since!
- 4) A little on the humorous side, one of the hand's wrist watch had been about 30 minutes slow every day until one day it finally stopped completely. Knowing how Power Up had fixed our shop clock, he slipped the back off of the watch and put one drop in. Yes the watch is now running, but unfortunately, now it's 30 minutes fast! He tried!

We at Dist. 1 are convinced that Power Up is real and look for even bigger results to come. We believe that Power Up has the potential to save the district some big money and highly recommend its usage to every other district!

Fred D Turner  
Dist. Manager

Jim Maehs  
Shop Foreman
