SUJECT: **POWER UP OIL ADDITIVE**

We are one of the largest Pschiatric Hospitals in Canada with over 800,000 sq. ft. plus over two miles of tunnels and corridors. In 2984 we installed a \$5.4 million de-centralized hot water heating system.

We were impressed by our demonstration of the Power Up product last Summer. We added Power Up to all our pump oil in each mechanical room as well as a few drops in the oil sump on each pump.

According to ur Operations Superisor, we reduced the aount of bearing failures by half during the past heating season. This represents about a two thousand dollar savings in parts alone, not including labor or downtime, that is a 25 to 1 payback.

With this type of performance, we will no boubt be ordering mor Power Up when we reach the re-order level.

Yours truly,

PLP:jo
