**SUBJECT** Power Up ThiXogrease Trial

**PHONE** 806-622-4433

Olin, I wanted to update you on the trial we are running here at the Amarillo Plant. As I reported to you in my June 15, 1995 letter, we are trailing ThiXogrease on winders 43, 44, and 45. These winders had a history of breaking 64 guideeyes per day using the Mystick JT-6 grease. That usage rate would convert to \$1,635 per year for the three winders. We started using ThiXogrease June 8, 1995. It is October 9, 1995 and we have not broken one single guideeyes between normal PM Schedules. We used less then one cartridge of ThiXogrease to save \$550 worth of guideeyes on that set of winders.

As a result, we are going to go across the board, using ThiXogrease, on all 140 winders for a six month trial. I am looking foreword to the results and I will be up dating you on our progress form time to time.

Regards,

A handwritten signature in black ink that reads "Ron Jackson".
