Mr. Jon Cleveland
Power Up
8034 S. Memorial
Tulsa, Oklahoma 74133

Dear Jon:

I am happy to drop you a line in order to tell you about the results we have seen using Power Up. After I saw your demonstration, I decided to give Power Up a try in my FMC pecan shaker that has given me a lot of trouble in the past. This unit had burned to the ground last year costing me \$15,000 in repairs. I wished that I would have had Power Up in it then in order to possibly save this cost. After it was rebuilt, the transmission was constantly over-heating which resulted in the need to shut it down occasionally to allow it to cool. After I added Power Up to the transmission, the temperature immediately dropped 20 degrees and has not overheated since. This saves me valuable down-time.

Another small application that I found for your product was when a knob on my TV set froze. The only thing that would turn it was a pair of pliers. I had tried WD-40 with no success. I put a few drops of Power Up on it, and it works like new. This is only a small thing, but I was impressed.

You have provided me with excellent service, and I would not hesitate to recommend Power Up to anyone who really wants their equipment to last longer and wants to avoid unnecessary down-time and repair expenses. It is definitely a money saver, and if anybody wants to call me and talk to me about these results, feel free to have them do so.

Yours Truly,

Lendall Hall
