TRUCKING & LEASING CO., INC.
NASHVILLE, TENNESSEE

August 13, 1991

Ms. Gale Beaty
Power Up lubricants
3371 Alfred Drive
Memphis, TN 38133

We have recently completed a series of tests on five trucks using Power Up oil Fortifier. Our test began the end of April 1991 and continued through the first week of August 1991.

Our test results were outstanding. We experienced an overall reduction in fuel consumption of 11% which will mean a saving of approximately \$200,000 per year in fuel alone not to mention the savings we will experience in longer engine life and reduced expense on replacement parts.

Sadler runs approximately 65 trucks an average of 250,000 miles per year. Based on the average 6.82 mpg reading, which was recorded prior to using Power Up, we are purchasing approximately 2,335,044 equates out to about \$256,854. I believe anyone would see this as a sizeable savings making Power Up worth every penny.

In addition, our mechanic noticed a 7% fop in rear end temperature from 150 degrees to 140 degrees. This tells me that less fiction thus less wear is occurring in the rear ends.

Thanks for introducing Sadler Bros. Trucking to Power Up oil Fortifier its a money saver.

Sincerely,

SADLER BROS TRUCKING & LEASING CO., INC.
